

INTERNATIONAL STUDENT BUDGET

Living and studying abroad is an invaluable experience, providing students with the unique ability to learn about foreign cultures and traditions, learn another language, and get an international education. These experiences often make the graduate well rounded and competitive in today's globalized job market. If you or someone you know is interested in studying abroad, then it's also important to consider the costs involved. Budget early, list your expenses, plan out emergencies, and make sure you've balanced your expenses with your ability to pay. We've created this budget outline to help you plan accordingly.
